

Oil & Gas Industry

Rotating equipment: Separators & Centrifuges for Oil Processing

Protect the feed chamber in the conveyor area with **LOCTITE PC 7219 High Impact Wearing Compound**

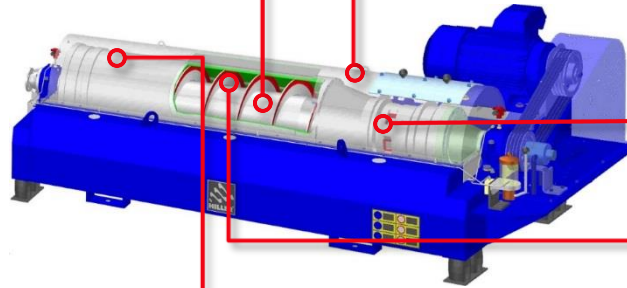

Coat the housing inside completely with **LOCTITE PC 7255 Sprayable Ceramic** to protect against corrosion

Repair any kind of cracks, spalling or chipping of pump foundation with **LOCTITE PC 7257 Magna Crete**

Bond sintered tungsten carbide cylinder into the radial holes with **LOCTITE PC 7228 Brushable Ceramic**.
Protect the cake discharge hub with **LOCTITE PC 7219 High Impact Wearing Compound**

Build pump base with **LOCTITE PC 7204 High Performance Quartz** and provide a chemical resistant foundation with superior mechanical resistance

Coat the entire surface of the bowl outer casing with **LOCTITE PC 7221 Chemical Resistance Coating** or **LOCTITE PC Srayable Ceramic**

Coat entire surface, or fill gaps between the ceramic or tungsten carbide tips of the conveyor with **LOCTITE PC 7227/7228 Brushable Ceramic**
